# Microsoft Depth Enablement – Learner Experience
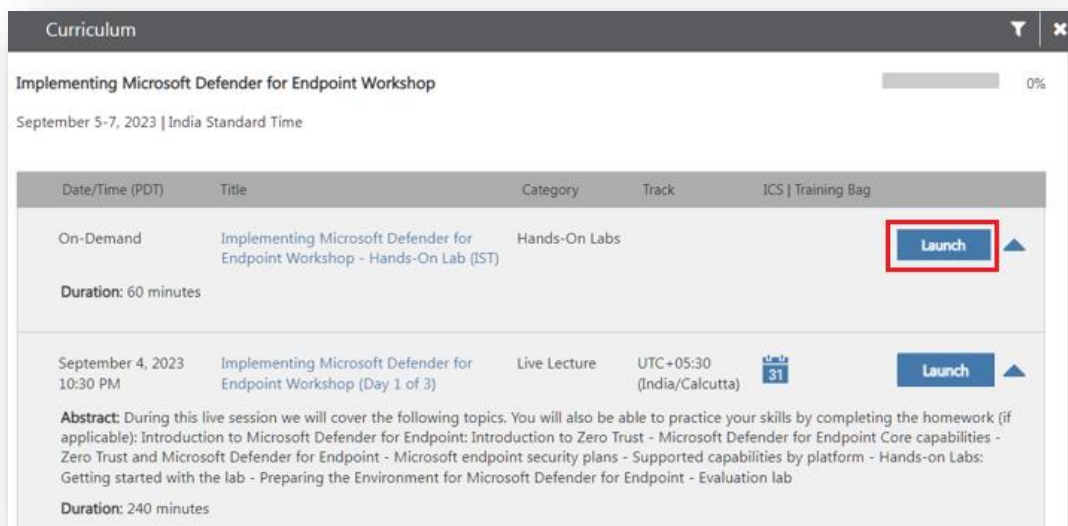

To access the labs for Microsoft Depth Enablement hosted by Skillable, learners will need to follow the steps below.

Once you have logged into the Depth Enablement portal:

1. Under the event name in the enablement portal click on "**Enroll**"
2. *Optional:* Select your preferred time zone

3. Click on "**Launch**" to start your lab

Note: to preserve your lab progress, please return the same lab via your Training Bag throughout the Depth Enablement event.

Once you have entered Microsoft Depth lab portal:

1. Using Edge, Chrome, Firefox, or another HTML5 compliant browser, you will be redirected from the On24 platform to the following page: cloudweeks.learnondemand.net/classenrollment/XXXXXXXX where "XXXXXXX" is your unique enrollment ID.

2. To be able to access the labs, you must agree to the Microsoft End User License Agreement. On the **Class Enrollment** page, to first view the agreement, select **View Agreement**. When the license
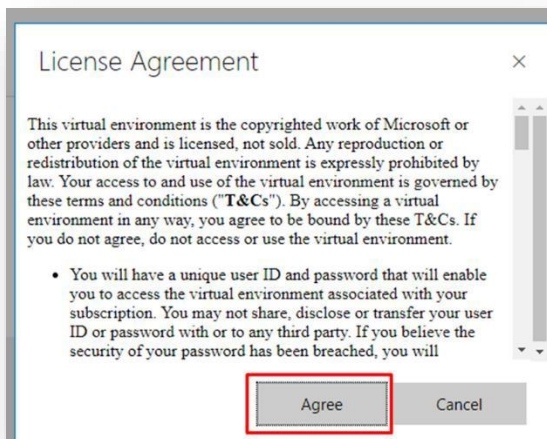

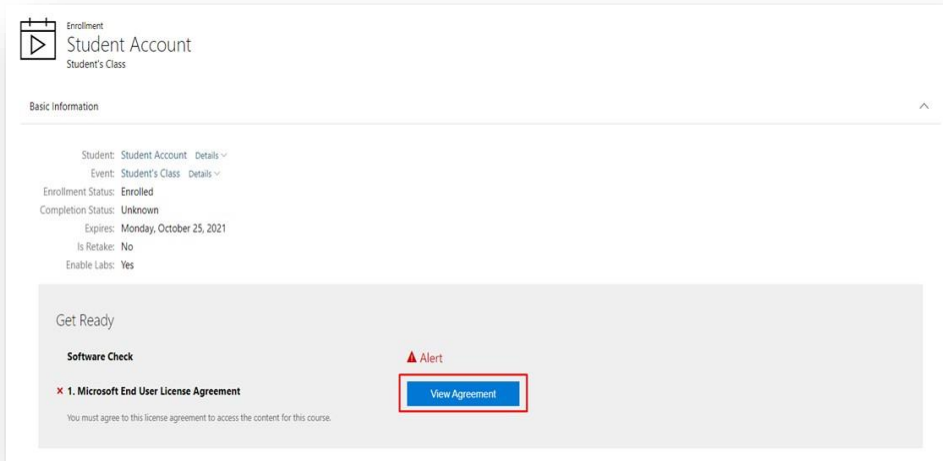

agreement is displayed, select **Agree**.

Labs are not available to be launched until a class has officially begun.

1. To view the time remaining until the lab is available, scroll down on the **Enrollment** page to the **Activities** section. A timer will start when there are 24 hours until the labs are available. You will also see how long you will have access to the content after the class ends.

2. If the class has started, a **Launch** button will appear under each activitiy. Select **Launch** to launch a lab.

If you navigate away from the **Enrollment** page or you are returning for another day to do labs, you will need to follow the same steps as previous days to login to the On24 platform and redirect to your

cloudweeks.learnondemand.net/classenrollment/XXXXXXXX page.

Skillable lab user interface
After launching a lab, you will be presented with the Skillable lab user interface, or lab UI. This UI consists of two panes: The pane on the left is the virtual machine(s) with which you will interact. The pane on the right contains three tabs: **Instructions**, **Resources**, and **Help**.

Lab User Interface
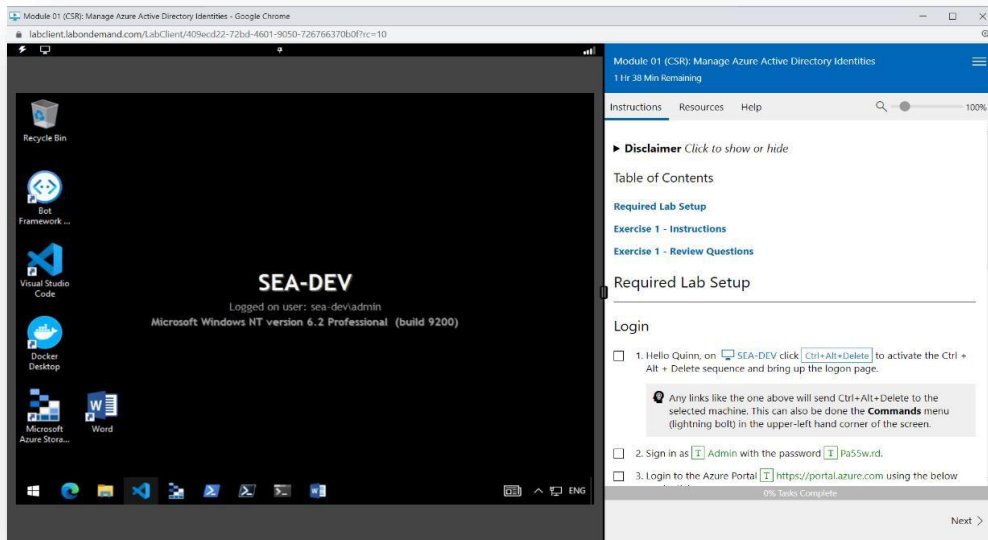

The **Instructions** tab is the lab guide, or lab steps. The navigation buttons are at the bottom of the pane. The hamburger menu in the upper right allows you to cancel or end your lab. This menu also has an option to split the panes into windows so you can reposition them. You will also see a slider bar you can adjust to zoom in or zoom out.

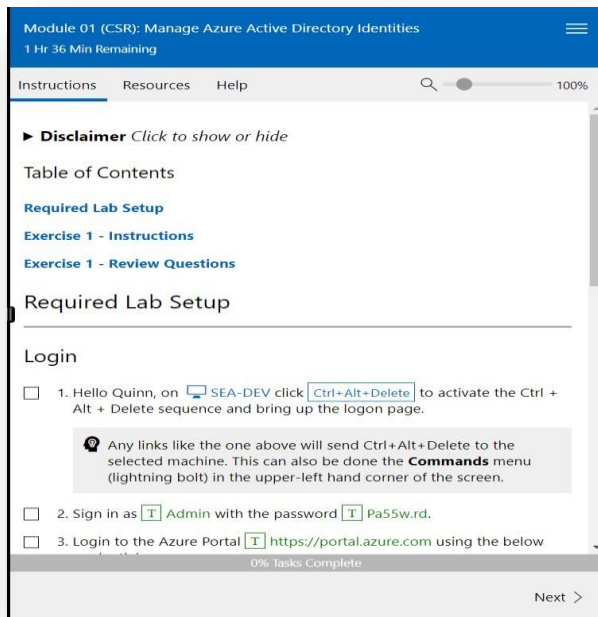

The **Resources** tab contains information about your VM(s) and provides easy access for viewing any Azure Promo Codes or demo cloud credentials.

NOTE: Any Azure Promo Codes or cloud credentials will also be displayed in the lab steps using replacement tokens when you need to use them.
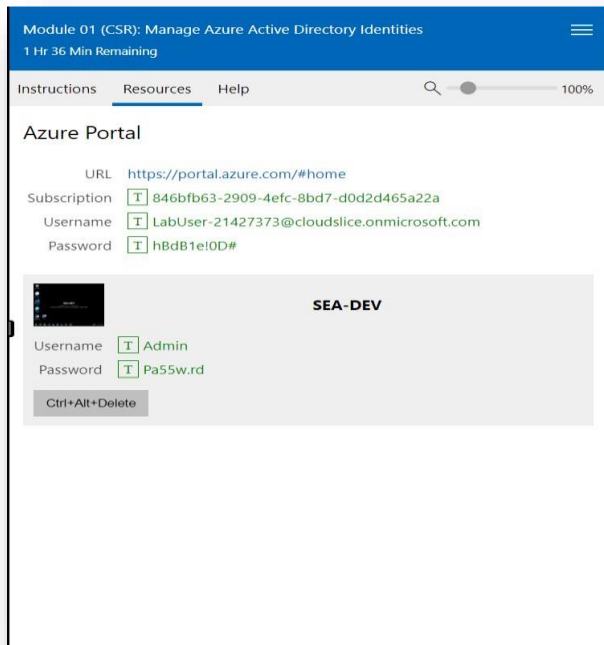

The **Help** tab allows you to adjust the color theme to your liking. The tab also contains information about your lab instance, in case you need to contact support. The **Help** tab also contains a thorough lab interface
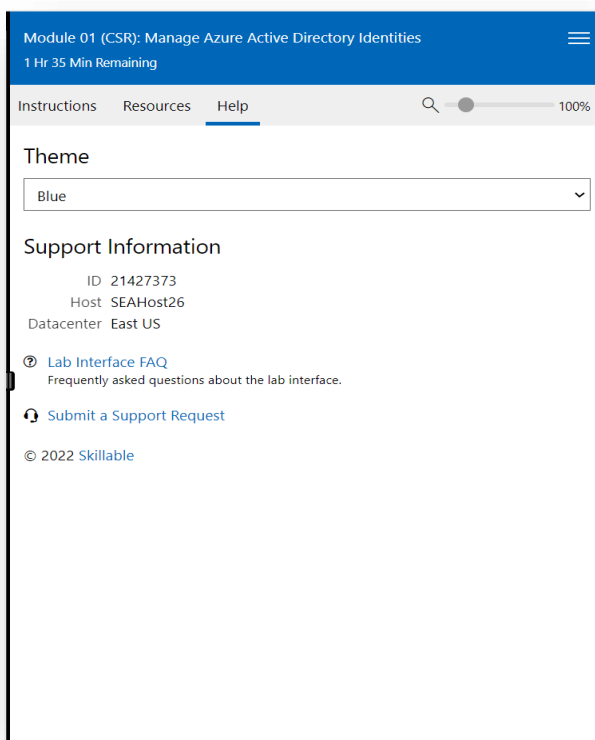

FAQ and a link to open a ticket with Skillable support. For more information on Skillable support, see the following section.

Skillable Support

The Skillable support team is available 24 hours a day, 7 days week and is ready to help with any issues that may come up with the lab environment.

If you encounter issues with the Skillable platform (issues encountered after navigating to cloudweeks.learnondemand.net) or with the lab interface, you can submit a ticket to our Platform Support team here: https://www.skillable.com/customer-support/

Scroll to the bottom of the page and click "Cloud Weeks Support"

If you are in need of support related to Microsoft Cloud Weeks, please refer to our Cloud Weeks support -> Cloud Weeks Support
